All styles can be made as mens and womens shoes

Size chart

All styles can be made as mens and womens shoes. Because our shoes are made using only leather, they will take the form of your shoes and expand with wear, both in length and width. Therefore you don't need to add extra width, and only between 5 to 10 mm in length. They will expand, but not shrink! If you don't think you will fit into one of our sizes, please message me to discuss.
